PROFESSIONAL SUMMARY

I am a dedicated Software Engineering graduate from the **Institute of Java and Software Engineering (IJSE),** passionate about creating innovative and efficient software solutions. I gained hands-on experience in backend development during my role as a Laravel Backend Developer at Webmotech (Pvt) Ltd. I am now seeking a **Full Stack Developer** position where I can further develop my skills, stay current with emerging technologies, and contribute effectively to a collaborative team environment.

PROFESSIONAL SKILLS

- **Programming Languages -** PHP | Java | JS | TS
- **Scripting Languages** - HTML | CSS
- **Frameworks & Libraries** - Laravel | React | Node | Spring Boot
- **Databases** - MySQL | PostgreSQL | MongoDB
- **DB Management Tools** - MySQL Workbench | pgAdmin 4 | MongoDB Compass
- **Architectures** - Monolithic | MVC | Layered | Microservices
- **Tools** - Postman | XAMPP | Figma | Docker | Tomcat | VSCode
- **Version Control** - Git | GitHub

SOFT SKILLS

- Active Listening
- Problem Solving
- Leadership Abilities
- Collaborative Team Player
- Strong Communication Skills

EXPERIENCES

- **Webmotech (PVT) Ltd**   [2024 Sep - 2025 Feb]
  Intern Software Engineer (Backend Developer - Laravel)

  Developed RESTful APIs, optimized database queries, and collaborated with teams to deliver efficient backend solutions.

  Worked Projects
  - Project Management Tool
  - CGL Plantation Backend
  - Employee Management System

[Service Letter]

PERSONAL PROJECTS

- **Leave Management System** [2024 Aug]
  - Frontend - React | Tailwind CSS | TS
  - Backend - Laravel | Passport | Permission
  - Database - MySQL

Description: A modern web application built with Laravel, React, and MySQL to streamline organizational leave management. It provides a seamless experience for employees and administrators through intuitive interfaces and secure API integration.

- **Simple To Do** [2024 Oct]
  - Frontend - React | Tailwind CSS | TS
  - Backend - Laravel
  - Database - MySQL

Description: A modern web application built with Laravel, React, and MySQL for efficient task management. It allows users to create, view, update, and complete tasks through a simple interface and smooth API communication.

- **Clyro - ECommerce** [On Going]
  - Frontend - React | Tailwind CSS | TS
  - Backend - Laravel | Passport | Permission
  - Database - MySQL

Description: A modern web application built with Laravel, React, and MySQL to deliver a complete eCommerce experience. It features product management, shopping cart, checkout, and vendor functionalities through secure and scalable API integration.
